Portfolio: https://nitoo-portfolio.vercel.app/

Professional Summary

Frontend Developer specializing in building scalable, high-performance and user-friendly web apps using React, Next.js, and modern UI frameworks. Proven experience in building AI tools, blog systems, and e-commerce features with a focus on usability and clean code.

Projects

1. AI Content Generator

Stack: Next.js, Tailwind CSS, Clerk, Gemini API, MongoDB

• Built a full-stack AI content generator using Next.js, Tailwind CSS, and Gemini API to automate content creation for users.
• Implemented secure authentication with Clerk, restricting dashboard access to registered users.
• Faced challenge in structuring editable content blocks and overcame it using dynamic form rendering and conditional logic.
• Added features like custom template selection, real-time AI content generation, and user-specific history tracking using MongoDB.

Live: ai-content-generator-830g.vercel.app

2. Dynamic Blog Website

Stack: Next.js, Tailwind CSS, MongoDB, Cloudinary

• Developed a responsive blog management system using Next.js and MongoDB, with admin dashboard for blog CRUD operations.
• Solved issues with Cloudinary image uploads and rendering by implementing async image preview and validation checks.

• Implemented category-based filtering, improving blog discoverability and UX.
• Added subscription feature prototype to collect user interest for future newsletter functionality.
